Mehmet Demir

FULL-STACK DEVELOPER

E-mail: demirmehmet226648@gmail.com LinkedIn: linkedin.com/in/mehmet-demir- Portfolio: cengmehmetdemir.com
Github: github.com/MehmetDemr

EXPERIENCE

Full-Stack Developer
Level End Yazılım A.Ş
08/2025 – 05/2026

Built full-stack applications using Node.js and Express.js on the backend, JavaScript, jQuery, TypeScript, HTML5/CSS3 and Next.js on the frontend, while also developing mobile features with React Native. Managed Docker-based project setup, database configuration, and dump/restore operations.

Full-Stack Developer Intern
Level End Yazılım A.Ş
06/2025 – 07/2025

Built Node.js-based automation bots to handle API operations, process large datasets, and manage data workflows in both CSV and JSON formats.

Full-Stack Developer Intern
Ottopus A.Ş
07/2024 – 06/2025

Developed and maintained ASP.NET-based admin panel interfaces, while supporting data management operations including data organization, updates, and system-level content control.

EDUCATION

Izmir Bakırçay University
Computer Engineering
2022-2026 Izmir, Turkey

Fatma Saygın Anatolian High School
2017-2021 Izmir, Turkey

SKILLS

BACK-END
C# | ASP.NET | Node.js | Express.js | NestJS | Java | Docker | REST API | GraphQL

FRONT-END
React | Next.js | TypeScript | JavaScript | HTML5/CSS3 | jQuery | Bootstrap | Tailwind CSS

CLOUD & TOOLS
AWS | Twilio (SMS OTP) | Brevo (Email SMTP) | Vercel | Hostinger | Railway | Render | Supabase | Google Tag Manager | Google Cloud (OAuth) | Apple Sign In (OAuth)

SUMMARY

I am Mehmet Demir, a Full-Stack Developer and Computer Engineering graduate from Bakırçay University. I have experience in building web and mobile applications using technologies such as Node.js, Express.js, NestJS, React, Next.js, React Native, ASP.NET, and SQL-based databases. I have worked on e-commerce, productivity, blog, and automation-focused projects, both individually and as part of development teams. I focus on building scalable, maintainable, and user-oriented software solutions.

PROJECTS

Dressify
Full-stack e-commerce platform developed with Node.js and TypeScript on the backend, React.js and TypeScript on the frontend, and deployed using AWS Amplify, Route 53, EC2, and RDS.

Blogy
A full-stack blog application built with ASP.NET Core, C#, MVC, and Onion Architecture, integrated with a Python FastAPI AI microservice for multi-label text classification using a TF-IDF model.

Tickio Web
A full-stack productivity platform built with Next.js and NestJS, designed for task management, daily planning, progress tracking, OTP-based account recovery, achievements, rankings, and productivity analytics.

Tickio Mobile
Mobile productivity application built with React Native, featuring task management, secure authentication, OTP-based password recovery, achievements, rankings, dashboards, and productivity analytics.

Wordplay
A full-stack competitive word gaming platform built with Next.js and TypeScript, featuring Wordle, Hangman, JWT and OAuth authentication, dynamic scoring, leaderboards, game history, and real-time player statistics.

Mehmet Demir Portfolio
A modern personal portfolio website built with Next.js and TypeScript, designed to showcase my projects, technical skills, experience, contact information, and downloadable resume with a responsive and SEO-friendly structure.
